

Bierley

MonoMouse™

The MonoMouse is perfect for reading newspapers, magazines, books, prescription bottles, cooking instructions, food labels, bills, statements and much more. Installation is easy, just plug the MonoMouse into any regular television, switch it on and enjoy reading even the smallest text as a large, sharp image on your screen. Operation couldn't be easier because you only need to switch to the video channel using your remote control and when you have finished reading, switch back to your favourite channel.

You can leave your MonoMouse connected to the television so that it is always ready to use.
