

Bierley

ColorMouse-RM™

The ColorMouse-RM is ideally for reading or looking at magazines, maps, prescription bottles, food labels, stamps, photos, and much more. Simply plug the ColorMouse-RM into any regular television, connect the power and press the large blue button, the magnifier is ready to be used and your television becomes a powerful low vision aid. Operation couldn't be easier because you just press your remote control "Video" button and when you have finished reading, switch back to your favorite channel. The RM (Reverse Mode) function makes it easier on the eyes for those people with acute light sensitivity.

You can leave your ColorMouse-RM connected to the television so that it is always ready to use.

**Non-Glare
Image**

The ColorMouse-RM offers all the features of our TV range in one product! Full color for magazine, grayscale for books and Reverse Mode for Macular Degeneration.
