Shoppa™

portable electronic magnifier

There are many different ways to use a Shoppa. For example, you can lay it on a newspaper and slide it along to read. With the camera in your hand, you can flip out the leg at the back of the Shoppa and stand it at the top of a book while reading. You can even take it to the library to assist you while choosing a book! At the supermarket, you can take a closer look at boxes, bottles, jars or packets; in fact just about anything in your hand or on the shelf. At a restaurant you can relax and enjoy the menu. The Shoppa is of course great for hobbies too.

If the battery runs out of power while you are out, simply clip in the optional spare battery.

- Ultimate portability
- Ultra lightweight
- Big 7" none glare screen
- Full colour
