BigReader-Mono

Black and White

The BigReader was specifically developed with libraries needs in mind. This means the image clarity, simplicity and robustness of its design offers superb functionality whilst blending flawlessly into the environment in which it is placed. There are two models, Black and White and Full Colour with reverse mode and enhanced positive mode. The monitor can be placed on any suitable surface, such as a desk or wall mounted using the industry standard VESA mounting points.

For public use locations, the BigReader camera unit can be connected to the monitor via a security bracket, which means that neither the camera nor the power supply can be removed without the correct tool. Brightness and Contrast can be adjusted if the user feels it necessary.

- Simple to Use
- Big, 17" screen
- No PC required
- Magnifies 17x
- Durable, CE approved, built to last
- Security feature for public locations
- Desk stand or wall mount
- No training needed
- Crisp, clear image
- Robust
