ColorMouse-RM™

The ColorMouse-RM is ideal for reading or looking at magazines, maps, prescription bottles, food labels, stamps, photos, and much more. By simply plugging the ColorMouse-RM into any regular television, connecting the power and pressing the large blue button, your television will change to the correct channel automatically on European models. The RM (Reverse Mode) function makes it easier on the eyes for those people with acute light sensitivity.

You can leave your ColorMouse-RM connected to the television so that it is always ready to use.

**Non-Glare
Image**

The ColorMouse-RM offers all the features of our TV range in one product! Full colour for magazine, greyscale for books and Reverse Mode for Macular Degeneration.
